

CREATING THE SPACE FOR BIG BUSINESS BREAKTHROUGHS.

It's the right space that fosters the right environment that leads to the right kind of breakthroughs. Whether it be an improvement that leads to enhancing your business model or a dramatic leap forward in helping shareholders clearly understand the value of their investment, Calgary TELUS Convention Centre (CTCC) provides you with the space you need to break through and beyond.

It's the space to reflect on the year passed and to celebrate and share in all that's been accomplished. More importantly, it's the space to jump ahead to a new year of capitalized opportunity and sought after growth.

Working with Calgary's corporate community, we provide the space to help them create the right experience that fosters corporate collaboration and big business breakthroughs.

We've introduced new spaces, including the CoLab and Ideation Centres, to foster discussion and improve collaboration through integrated working groups. These rooms are newly appointed with furnishings and technology that encourages personal interaction and provides the space for effective teamwork.

We've created the perfect environment for business leaders looking to present the right image to their valued teams and stakeholders. Our newly renovated boardrooms are inviting spaces equipped with all that is needed to improve communication with stakeholders near and far.

And for those needing to present their organization in the right light at the annual AGM, our grand halls and team of industry experts help to provide everything you need to put your team, your organization and your stakeholders at the centre of it all.
